

Hardik Arora

Mississauga, ON — +1 (437) 665-1810 — hardikarora0622@gmail.com — [LinkedIn](#) — [GitHub](#)

Profile

Detail-oriented Computer Science student at York University with strong experience in database systems, data migration, and analytics. Skilled in PL/SQL, Oracle Golden Gate, MySQL, and Power BI, with proven ability to deliver secure, efficient, and data-driven solutions in enterprise environments.

Technical Skills

Languages: SQL, PL/SQL, Python, Java, JavaScript, HTML, CSS

Databases: Oracle, MySQL, MongoDB

Tools/Frameworks: Power BI, Pandas, NumPy, React.js, Express.js, Firebase, Git, WordPress

Other: Oracle Golden Gate, JIRA, Azure DevOps, Linux/Unix

Soft Skills: Problem Solving, Communication, Teamwork, Adaptability, Time Management, Analytical Thinking

Experience

Technology Specialist (Co-op)

Ministry of Public and Business Service Delivery and Procurement – Ontario Public Service *Sept 2025 – Present*

- Contribute to the **Digital Compliance Platform (DCP)**, an enterprise-level application supporting multiple ministries in compliance and regulatory monitoring.
- Utilize **PL/SQL and Oracle Golden Gate** to manage and shift data between DCP and the Justice Tracking System (JTS), ensuring secure and efficient data migration.
- Collaborate with IT professionals throughout the SDLC (Agile/Sprints), documenting processes and updating design standards.
- Manage issues and user stories in JIRA develop automation scripts and perform functional, non-functional, and accessibility compliance testing.
- Support incident management and resolution, coordinating with cross-functional teams to ensure operational continuity.

Software Developer Intern

Global ERP Solutions – GetVirtual AI Platform

May 2024 – Aug 2025

- Built a WordPress-based **AI voice assistant platform** integrating Retell AI, improving customer engagement for small businesses.
- Designed and deployed analytics dashboards, visualizing call success, sentiment, and performance metrics.
- Automated workflows using Node.js and Python, reducing manual configuration time by 30%.

Projects

Data Migration Project: DCP → JTS

PL/SQL, Oracle Golden Gate, Oracle Database

- Designed and executed secure data migration processes between enterprise systems using **Oracle Golden Gate**.
- Wrote and optimized **PL/SQL scripts** for extraction, transformation, and loading (ETL) to ensure data accuracy.
- Coordinated with cross-functional teams to validate migrated data and resolve synchronization issues.

HR Employee Distribution Dashboard

MySQL, Power BI

- Designed an interactive **Power BI dashboard** to visualize workforce distribution and trends, enabling HR to make data-driven decisions.
- Integrated **MySQL** for data extraction and management, improving efficiency of workforce analysis and business intelligence reporting.

Education

Bachelor of Science Honours in Computer Science

York University, Lassonde School of Engineering

Toronto, ON

2022 – 2026

Relevant Courses: Advanced Object-Oriented Programming, Data Structures, Software Design, Database Systems, Computer Architecture, Software Tools, Python

Volunteer Experience

Visionaries Together We Achieve (NGO)

- Collaborated on initiatives aimed at empowering underprivileged communities through education and skill development.
- Assisted in planning and coordination of awareness events to maximize community reach.
