EDUCATION

York University, Lassonde School of Engineering

Bachelor of Science Honours in Computer Science

Toronto, ON

2023 – Present

EXPERIENCE

Information Technology Assistant

May 2026 – Present

York University

Toronto, ON

- Troubleshoot hardware, software, and network issues to ensure stable daily IT operations across academic systems
- Support installation, configuration, and maintenance of enterprise applications and institutional IT tools
- Analyze operational data and generate reports and visual insights to support IT decision-making.
- Identify workflow inefficiencies and contribute to process improvement initiatives within IT operations.

Information Technology System Analyst (Co-op)

Jan. 2026 – April 2026

Ministry of Public and Business Service Delivery and Procurement – Ontario Public Services

Toronto, ON

- Supported User Acceptance Testing (UAT) by coordinating with business stakeholders and translating technical system behavior into functional validation criteria
- Performed database gap analysis to identify structural inefficiencies and proposed optimization strategies for improved query and retrieval performance
- Designed and managed end-to-end ETL pipelines to extract, transform, and load data from legacy systems into modernized database environments
- Created technical documentation including data mapping rules, system workflows, and ETL design specifications for long-term system maintainability
- Developed and executed SQL-based validation scripts to test stored procedures, triggers, and data integrity across enterprise databases

Technology Specialist (Co-op)

Sept. 2025 – Dec. 2025

Ministry of Public and Business Service Delivery and Procurement – Ontario Public Services

Toronto, ON

- Contributed to the Digital Compliance Platform (DCP), an enterprise-grade application used for regulatory and compliance tracking across ministries
- Implemented secure data migration workflows using PL/SQL and Oracle GoldenGate between DCP and Justice Tracking System (JTS)
- Participated in Agile SDLC processes including sprint planning, development cycles, and technical documentation updates
- Managed tickets and user stories using JIRA and supported functional, non-functional, and accessibility testing across system modules

PROJECTS

AI Resume Analyzer | *React, Spring Boot, MySQL, Google Gemini API, REST APIs*

- Created a full-stack web application that analyzes resumes using AI to extract skills, score profiles, and generate improvement recommendations
- Built RESTful APIs with Spring Boot and MySQL to manage users, resume data, and analysis results.
- Formulated scalable backend architecture supporting structured resume parsing and analysis workflows

Workout Tracker (Full-Stack Application) | *Spring Boot, MySQL, JWT, REST APIs, Docker*

- Established a secure workout tracking system with JWT-based authentication and role-based API access.
- Designed normalized relational database schema for workouts, exercises, and progress tracking
- Built REST APIs for workout creation, scheduling, updates, and performance tracking
- Containerized the application using Docker Compose for consistent local deployment.

TECHNICAL SKILLS

Languages: SQL, PL/SQL, Python, Java, JavaScript, HTML/CSS, Node.js

Databases: Oracle, MySQL, MongoDB

Tools/Frameworks: Power BI, React.js, Springboot, Express.js, Firebase, Git, WordPress, Stripe API, NumPy

Other: Oracle Golden Gate, JIRA, Azure DevOps, Linux/Unix, ETL, UAT

Soft Skills: Teamwork, Analytical Thinking, Problem Solving, Stakeholder Management
